Abstract

Title of the manuscript

Author One[a], Author Two[b] and Other[c]

[a] University or Company, Department, City, Country **(11 Font size)**
[b]University or Company, Department, City, Country
[c]University or Company, Department, City, Country

Abstracts accompany all articles in Scientific Society journals. They are often republished as printed in secondary abstracting services and journals. The abstract, therefore, should meet two requirements. An abstract should be able to tell quickly the value of the research will be published. It also should provide the literature searcher enough information to assess its value and to index it for later retrieval.

The abstract should:
- Strive for an impersonal, noncritical, and informative account.
- Give a clear, grammatically accurate, exact, and stylistically uniform treatment of the subject.
- Provide rationale or justification for the study. The statement should give a brief account of the purpose, need, and significance of the investigation.
- State the objectives clearly as to what is to be obtained.
- Give a brief account of the methods, emphasizing departures from the customary.
- State results succinctly.
- Outline conclusions or recommendations, if any. An emphasis of the significance of the work, conclusions, and recommendations.
- Never cite references.
- Contain about 300 to 600 words.

Corresponding Author: email
Type name, title, institution, address, email, phone/fax – each on a new line.
Format: Times New Roman, 12-point font size, left justified.

The Abstracts should be submitted in the **Easy Chair portal** (check the conference website).

Note: Authors who have already submitted and received acceptance are also required to resubmit their abstracts via the portal for final consideration.
